NOTES ABOUT THE MOON MY FAVORITE STELLAR BODY OF THE MOMENT IN HALF TRANSLATION

luna large circle in the sky sometimes, sometimes a banana, sometimes just nothing

lunes feast day for the moon goddess, first day of the work week

lunares literally small brown (or black) moons on your face

luna llena when the moon looks like a cheesecake

cambiar de luna change moods/moons

lunatico crazy maybe because of the lunar cycle (lycanthropy is also blamed on the moon)

estar en la luna to daydream about the moon?; to be out of it

cara de luna llena a face that's full like a baby doll with a porcelain head, big cheeks, tiny lips

pedir la luna to ask for the moon; you can't have it but you can have a helium balloon which also

floats in the sky; you can videotape yourself in the desert and say you have the moon
