

Corrigendum to "Inscriptions of the Antikythera Mechanism" Paper no. 6, pp. 282–283:

The formulas for  $\beta$  and  $\Delta\lambda_{\text{STN}}$  (for both inferior and superior planets) are misprinted. The correct formulas are:

$$\beta = \arcsin\left(\frac{\rho + \rho/\bar{c}}{R}\right) - \arcsin\left(\frac{\rho/\bar{c}}{r}\right)$$

$$\text{Inferior planet: } \Delta\lambda_{\text{STN}} = \gamma = 90^\circ - \arcsin\left(\frac{\rho + \rho/\bar{c}}{R}\right)$$

$$\text{Superior planet: } \Delta\lambda_{\text{STN}} = 90^\circ + \arcsin\left(\frac{\rho/\bar{c}}{r}\right)$$

$$\text{where } \bar{c} = \bar{v}_p / \bar{v}_c$$

(With thanks to Paul Iversen for detecting these errors.)

Note that the tables on pp. 283–284 are correctly calculated.
